Summary

Full Stack Web Developer experienced in building practical, scalable solutions that enhance user experience and meet business needs.

Education

Bachelor of Sciences in Computer Science

National University of Sciences and Technology (NUST), Islamabad
Sep, 2018 - Jun, 2023

Technical Skills

Laravel, React, Vue, PHP, Filament, JavaScript, TypeScript, Tailwind, Git, Metronic Pusher Passport Stripe Customer.io Twilio

Soft Skills

Strong Problem-Solving, Resilient, Articulate

Languages

English, German, Arabic, French

Work Experience

Hybrid Media Works, Islamabad

Junior Laravel Developer

Feb, 2025 - Present

Developed and maintained multiple Laravel-based applications and internal tools.

- Implemented a blog CRUD during internship and later migrated it to Filament for better maintainability.
- Redesigned an attendance management system using the Metronic theme and resolved critical bugs while integrating Stripe payments.
- Integrated Tipalti API for affiliate-based payment automation and executed marketing campaigns (email & WhatsApp) using Customer.io and Twilio.
- Currently building a third-party logistics & warehousing platform enabling user registration and connector integrations (e.g. Shopify, 1500+ connectors).

Briskbase | Gojra (Remote)

Full Stack Developer

Jun, 2025 - Sep, 2025

Delivered full-stack solutions and optimized core POS and delivery systems.

- Developed POS features including printer integration, customer display, and event dispatching via Pusher.
- Implemented permission-management CRUD and executed dynamic access control for clients using Passport.
- Optimized performance with local caching and query indexing proposals; migrated modules and bug-fixed Blade, Vue, and Laravel components.
- Contributed to delivery-related modules built on Filament, enhancing operational efficiency.

Sysvoy International, Lahore

Associate Software Engineer

Nov, 2024 - Feb, 2025

Worked on a merchandise automation platform for a German client using Symfony, React, and API Platform.

- Developed features such as ChatGPT integration and a ComfyUI-based image generation pipeline with webhook step tracking.
- Implemented PNGQuant and PHP libraries for image compression/resizing to meet Amazon's quality requirements.
- Executed multiple day-to-day tasks leveraging webhooks to streamline data flow between services.
